

CIW WEB SITE MANAGER COURSE

The CIW (Certified Internet Web Professional) program is the world's fastest growing vendor-neutral Internet certification for the knowledge economy. More than a certification or a curriculum publisher, CIW is a Web technology standard adopted by academic institutions, governments, and businesses worldwide.

CIW has emerged as the leading job-role certification in the UK because it demonstrates an individual's competency in Internet industry standards, concepts and best practices, and provides familiarity with leading hardware and software applications.

Master CIW Web Site Manager certification prepares IT managers to perform critical cross-functional skills in Web site design, programming languages and server administration.

Master CIW Web Site Managers can manage Web servers and maintain Web sites for small, medium and large enterprises.

Master CIW Web Site Manager certification can lead to a successful career as a Webmaster, intranet or extranet Web administrator, or Internet project manager.

Candidates must pass five required CIW exams to become a Master CIW Web Site Manager (CIW Professional). Firstly candidates must pass the CIW Foundations 1D0-510 exam and then move onto the 1D0-520 Site Designer, 1D0-450 Server Administrator and 1D0-435 & 1D0-437 Web Languages exams covered in this course.

Please Note: You must have passed your CIW Foundations 1D0-510 exam before you can do any of the CIW Master Designer exams. The CIW Foundations course is not included in the CIW Master Designer course package.

Distance Learning Centre is proud to be an official partner of **Official Certified Internet Webmaster (CIW) v5 Certification Courses**.

The Official CIW Self Study courses are a convenient learning tool for individuals who do not have the flexibility to attend traditional classroom training.

Price:
£700.00

350 Hours of Self Study

The CIW Web Site Manager Course includes the following items:

- Official CIW course books covering the complete CIW Site Designer 1D0-520 syllabus.
- Official CIW course books covering the complete CIW 1D0-450 Server Administrator syllabus.
- Official CIW course books covering the complete CIW 1D0-435 & 1D0-437 JavaScript & Perl Web Languages syllabus.
- Convenient online access to official practice exams (Over 400 questions per exam).

➤ **CIW Site Designer 1D0-520 Course Books**

The CIW Site Designer exam validates human-factor principles in designing, implementing and maintaining hypertext-based Web sites using authoring and scripting languages, content creation and management tools, and digital media tools.

➤ **CIW Server Administrator 1D0-450 Course Books**

The CIW Server Administrator course focuses on server and network administration tasks and tools implemented by IT professionals. CIW Server Administrators manage and tune corporate e-business solutions and infrastructure including Web, FTP, news and mail servers, for midsize to large businesses. This certification validates knowledge and skills in configuring, managing and deploying e-business solutions servers.

➤ **CIW JavaScript Fundamentals 1D0-435 Course Books**

The CIW JavaScript Fundamentals course focuses on the language fundamentals and syntax of the JavaScript language for Web application development. A passing score on this exam validates proficiency in JavaScript code, which is recommended for those taking the CIW Application Developer exam, and required for those seeking Master CIW Web Site Manager and Master CIW Enterprise Developer certifications.

➤ **PERL Fundamentals 1D0-437 Course Books**

The CIW Perl Fundamentals exam focuses on the language fundamentals and syntax of the Perl language for Web application development. A passing score on this exam validates proficiency in Perl code, which is recommended for those taking the CIW Application Developer exam, and required for those seeking Master CIW Web Site Manager and Master CIW Enterprise Developer certifications.

➤ **CIW VCampus online Practice Exams (12 Months Access)**

The CIW Certification Practice Exams help measure proficiency on specific topics or the full range of CIW skills objectives. With over 400 exam questions per exam subject, this powerful tool can be used to pre-assess certification aptitude, to prepare for the high-stakes exam environment, and to identify skills gaps and additional study needs.

Pre-Requirements:

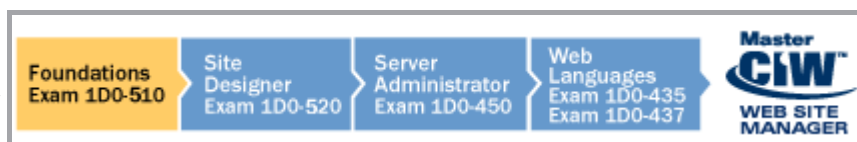

You are required to have passed the CIW Foundations exam before starting any other professional level CIW syllabus.

Course Duration & Support:

Students may register at any time. The courses are designed as self-study courses but if you have any problems you can email our technical support service. As the courses are self study you can complete in as little or as long a time as you prefer, and we do not impose a cut-off date for study. We do recommend completing study within a 12 month period as industry recognised syllabus could be subject to changes.

Qualifications:

On Completion of this curriculum, you can apply for the internationally recognised CIW Site Designer 1D0-520, Server Administrator 1D0-450, JavaScript Fundamentals 1D0-435 & PERL Fundamentals 1D0-437 Examinations.

Examinations are currently £89.00 + VAT each. Exams must be sat at a registered Prometric or Pearson VUE testing centre. You can locate testing centres and schedule appointments on their Websites:

Prometric website – <http://www.prometric.com/>

Pearson VUE - <http://pearsonvue.com/>
