

## CIW ENTERPRISE DEVELOPER COURSE

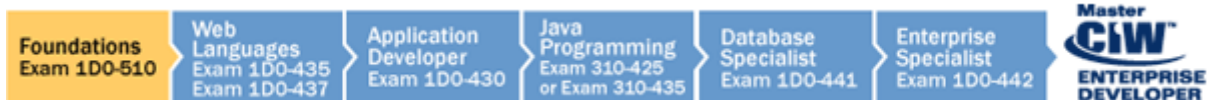

The CIW (Certified Internet Web Professional) program is the world's fastest growing vendor-neutral Internet certification for the knowledge economy. More than a certification or a curriculum publisher, CIW is a Web technology standard adopted by academic institutions, governments, and businesses worldwide.

CIW has emerged as the leading job-role certification in the UK because it demonstrates an individual's competency in Internet industry standards, concepts and best practices, and provides familiarity with leading hardware and software applications.

The Master CIW Enterprise Developer track teaches business-critical skills in programming and engineering to help applications systems and databases function more efficiently.

Master CIW Enterprise Developers build n-tier database and legacy connectivity solutions for Web applications using Java, Java APIs, Java Database Connectivity (JDBC) solutions, middleware tools, and distributed object models such as CORBA/ORB and IIOP. Master CIW Enterprise Developer certification can lead to a successful career as a database developer and administrator, Internet application developer, middleware programmer, Java developer or client/server developers.

Candidates must pass seven required exams to become a Master CIW Enterprise Developer (CIW Professional). Firstly candidates must pass the CIW Foundations 1D0-510 exam and then move onto the 1D0-435 & 1D0-437 Web Languages exams, 1D0-430 Application Developer exam, Database Specialist 1D0-441 exam, Enterprise Specialist 1D0-442 exam and Sun Microsystems Java Programming 310-435 exam covered in this course.

**Please Note:** You must have passed your CIW Foundations 1D0-510 exam before you can do any of the CIW Master Designer exams. The CIW Foundations course is not included in the CIW Master Designer course package.

Distance Learning Centre is proud to be an official partner of **Official Certified Internet Webmaster (CIW) v5 Certification Courses**.

The Official CIW Self Study courses are a convenient learning tool for individuals who do not have the flexibility to attend traditional classroom training.

### ➤ **CIW JavaScript Fundamentals 1D0-435 Course Books**

The CIW JavaScript Fundamentals course focuses on the language fundamentals and syntax of the JavaScript language for Web application development. A passing score on this exam validates proficiency in JavaScript code, which is recommended for those taking the CIW Application Developer exam, and required for those seeking Master CIW Web Site Manager and Master CIW Enterprise Developer certifications.

**Price:**  
£1400.00

**Instalment Options:**  
You can spread the payments for this course over 4 monthly payments. 1 initial payment of £755.00, followed by 3 monthly payments of £215.00.

**Course Format:**  
Books, Online & CD Rom

**Assessment:**  
6 Exams in Total

**Approximate Study Time:**  
800 Hours of Self Study

➤ **PERL Fundamentals 1D0-437 Course Books**

The CIW Perl Fundamentals course focuses on the language fundamentals and syntax of the Perl language for Web application development. A passing score on this exam validates proficiency in Perl code, which is recommended for those taking the CIW Application Developer exam, and required for those seeking Master CIW Web Site Manager and Master CIW Enterprise Developer certifications.

➤ **CIW Application Developer 1D0-430 Course Books**

The CIW Application Developer course focuses on the creation of interactive Web pages using client-side and server-side Web applications, and related component technology implementations. This certification validates knowledge and skills in building client-side and server-side Web applications using Rapid Application Development tools, and using component technologies to implement two-tier database connectivity solutions.

➤ **CIW Database Specialist 1D0-441 Course Books**

The CIW Database Design Specialist course focuses on the planning and design of relational databases. This certification validates knowledge and skills in defining the structure of a database; employing entity relationship (ER) diagrams and normalization to optimize databases; building database client applications; and performing database maintenance and security administration.

➤ **CIW Enterprise Specialist 1D0-442 Course Books**

The CIW Enterprise Specialist exam focuses on the development and deployment of complete software solutions tailored to business domains. This certification validates knowledge and skills in building n-tier database business solutions using Java in conjunction with distributed application architecture technologies such as Enterprise JavaBeans and CORBA.

➤ **Sun Microsystems Java Programming 310-435 Course Books**

The Sun Certified Programmer for Java 2 course focuses on the language fundamentals and syntax of the Java programming language. A passing score on this exam validates proficiency in Java programming, which is required for those seeking Master CIW Enterprise Developer certification.

Sun Certified Programmer for Java 2 satisfies a CIW language theory requirement. CIW language theory exams qualify only toward completion of Master CIW certifications. The Sun Certified Programmer for Java 2 exam also qualifies candidates for Sun Java Programmer certification.

➤ **CIW VCampus online Practice Exams (12 Months Access)**

The CIW Certification Practice Exams help measure proficiency on specific topics or the full range of CIW skills objectives.

**Please Note: Currently we can only supply practice exams for the CIW Database Specialist 1D0-441, CIW JavaScript Fundamentals 1D0-435 and CIW PERL Fundamentals 1D0-437 Courses.**

**Pre-Requirements:**

You are required to have passed the CIW Foundations exam before starting any other professional level CIW syllabus.

**Course Duration & Support:**

Students may register at any time. The courses are designed as self-study courses but if you have any problems you can email our technical support service. As the courses are self study you can complete in as little or as long a time as you prefer, and we do not impose a cut-off date for study. We do recommend completing study within a 12 month period as industry recognised syllabus could be subject to changes.

**Qualifications:**

On Completion of each syllabus, you can apply for the appropriate internationally recognised Examination. The course covers 6 separate exams, plus the CIW Foundations exam which you are required to have completed before starting any of the professional level examinations.

Examinations are currently £89.00 + VAT each. Exams must be sat at a registered Prometric or Pearson VUE testing centre. You can locate testing centres and schedule appointments on their Websites:

**Prometric website – <http://www.prometric.com/>**

**Pearson VUE - <http://pearsonvue.com/>**
